OKIFAX *4550*

Digital LED Plain Paper

Imagine a compact, reliable fax machine that not only delivers superb quality and performance, but also lets you use high-speed ISDN lines or communicate easily between fax and e-mail on a PC. That's the brilliant thinking behind* **OKIFAX** *4550.*

As your personal fax in a large company or as a versatile machine for a small or home office, **OKIFAX** *4550* is fast enough for the most demanding requirements. With its built-in, 33.6K modem and fast Digital LED engine it can send a full A4 page in just 3 seconds and print 8 crisp, clear pages of text in just a minute.

Amazing flexibility

In addition to high-quality faxing, OKIFAX *4550* offers the flexibility to grow with your business needs such as high-speed, high quality transmission via ISDN option, printing, PC-faxing, scanning and document management via multi-interface kit or sending international faxes via internet to save costs.

More speed, less effort

Many other features help you save time and effort – like quick, 6-seconds-a-page scanning that frees up the machine quickly, and the G4 ISDN option for rapid, high-quality transmission (200 x 200 dpi in 3 seconds, or 200 x 100 dpi in 1.5 seconds). In addition, advanced dialling features include 10 one-touch numbers, 70 speed dials and 5 groups – so it's quick and easy to call frequently used numbers, with less risk of misdialling.

Dual access operation allows you to send faxes and print incoming messages simultaneously. And you can save even more time with the instant dial feature by transmitting a multi-page document as soon as a connection is made – with no need to wait until all the pages have been scanned.

Business-class documents

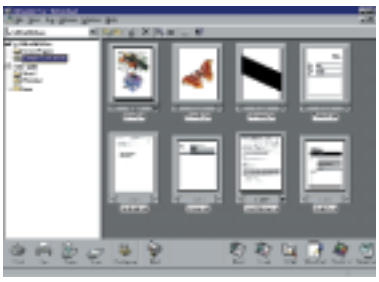
OKIFAX *4550's* ability to transmit and receive at 300dpi, combined with Oki's Smoothing Technology and 64 grey scales, means incoming faxes are always business-quality documents. Just as important - OKIFAX *4550* uses Oki's own, unique Digital LED technology, which is highly reliable because it has fewer moving parts than laser machines.

Excellent paper handling

A paper capacity of 100 sheets as standard helps ensure your OKIFAX *4550* is always ready to print incoming faxes. Even if the paper tray is empty, the generous 2 Mb memory can store up to 160 pages of incoming messages. You can also use the memory to store outgoing faxes for distribution to up to 90 addresses, or for later, off-peak transmission. And with the 20-sheet automatic document feeder, you can send long faxes without constant supervision.

Upgradable for multiple functions

With a simple Multi-Function Product upgrade you can also use your OKIFAX *4550* as a true Multi-Function Peripheral. An optional 'Oki Multi-Interface Kit' opens the way to high-quality Digital LED printing at 8ppm with 600dpi-class output; 300dpi scanning; faxing direct from your PC; and document management with JetSuite Pro software.



OKIFAX

Fast, economical communication worldwide

OKIFAX *4550*

Internet-ready efficiency*

With OKIFAX *4550* you can fax direct to any PC e-mail address, and retrieve and print out incoming e-mails and selected Web pages – all as easily as using a fax machine, and without having to switch on a PC. Far more economical than using the Public Switched Telephone Network, you can send a fax across the world on the Internet for the cost of a local call.

OKIFAX *4550* uses the global Fax2Net service from ShareMedia, the premier provider of unified e-mail, fax and voice services. It can transmit to and receive from any legacy fax, or any PC with an e-mail address. Simply send your faxes when convenient, and the service will store and forward them just like normal e-mail.

Environmentally sound

Like all Oki products, the OKIFAX *4550* has been designed from the start to be easy to use and robust in operation. Its neat, compact design takes up little desk space, making it the ideal solution when space is limited. Thanks to Oki's attention to detail and power consumption of less than 0.5W in power save mode, this product is also able to carry the Energy Star EPA Pollution Preventer logo.

People to People Technology working for you

Oki creates products with the single aim of helping customers improve their communications easily, by using technology as a means, not an end. OKIFAX *4550* is part of this philosophy, and puts high-quality communications within everyone's reach. In addition, it's backed by the extensive support and resources of a major international company.

OKIFAX *4550* highlights

- **High quality, Digital LED plain paper fax**
- **High speed 33.6K modem for 3 secs per page transmission**
- **Scanning and transmission resolution of 300dpi**
- **Scanning at 6 secs per page**
- **Fax to PC via the Internet***
- **100-sheet paper capacity/20-sheet ADF**
- **2 Mb (approx 160 pages) standard memory**
- **Dual access**
- **10 one-touch and 70 speed dials**
- **Instant Dial feature.**

TECHNICAL FEATURES

Major Applications

A compact design for desktop use, the OKIFAX *4550* is a high-quality Digital LED plain paper fax ideal for personal use in a large company, or for small and home office applications. In addition to professional features such as fast scanning, transmission and printing, it offers fax-to-PC communications and ISDN upgradability.

Ease of use – dialling/display

- Speed dials: 10 one-touch, 70 speed and 5 groups
- Automatic alternative dialling (second number programmed on the one-touch key is dialled when the first is busy)
- Message display: 2 lines x 20 characters

Ease of use – memory features

- 2 Mb memory standard (approx 160 ITU no.1 A4 pages)
- Delayed send: 5 transmissions within 3 days
- Broadcast up to 90 locations
- Delayed broadcast
- Out of paper/toner receive
- Closed network: direct mail rejection
- Page re-transmission of any page that is distorted during transmission from memory
- 8 confidential mailboxes (ITU subaddressing)
- Bulletin polling with 8 mailboxes (ITU Selective Polling)
- Instant dialling: initiates connection immediately
- Relay broadcast initiate.

Ease of use – auto switching

- Auto Tel/Fax switch: use as a fax or phone using optional handset
- TAD interface for plug-in answering machine
- Dual access: printing and sending simultaneously reduces queuing at machines

Paper handling

- 100-sheet paper capacity
- 20-sheet automatic document feeder
- Document size: A4

Image quality – output, scanning, copying

- Oki Digital LED 8ppm engine, superior quality/reliability
- Oki Smoothing Technology (Q600dpi resolution)
- 64 grey scales
- Auto reduction: automatic from 100% to 75%
- Scanning speed: 6 seconds per page at standard fax resolution
- Resolution: 300 x 300 dpi
- Multiple local copying: up to 50 A4 copies

Lower running costs

- Idles on minimum power (<0.5W in power save mode)
- Low cost per copy, separate toner and drum units
- Toner: 1875 pages A4 (based on 4% coverage)
- Drum: 8000 pages A4 (based on 3 pages per job) or 10000 pages (continuous printing)

Environmentally friendly

- <0.5W power consumption in power save mode
- Separate toner and drum for less waste
- Virtually zero ozone emission
- When idling: no fan noise
- All major plastic parts marked for recycling
- Energy star compliant

Speed, power, specification

- 3 secs transmission speed with 33.6K modem and MMR coding
- 8 ppm print speed
- Error Correction Mode : ensures reliable transmission
- Compatibility: G3 standard, optional G4
- Telephone line: PSTN/PBX (direct line/switchboard), ISDN option
- Weight approx 8Kg
- Dimensions 316 x 383 x 190mm (W x D x H)
- Options:
  - Internet faxing via Fax2Net (fax over IP, fax to e-mail, virtual e-mail, web retrieval)
  - G4 ISDN (transmits at 3 secs per page 200 x 200 dpi or 1.5 seconds 200 x 100 dpi)
  - JetSuite MFP package.
